

Mohammed Fares Saadallah

WORK EXPERIENCE

Soft-Y, Mosul-Iraq – *Software Engineer*

OCT 2025 - MAR 2026

- Define and review requirements and use cases for the application.
- Design the application to meet the business process design and application requirements.
- Fix any defects and performance problems discovered during testing.
- Create technical and functional/end-user operational documentation for the software or system.
- Database analysis and relationships design, and building backend interfaces for applications and websites.

EDUCATION

Software Engineering, Mosul-Iraq – *BSc.*

SEP 2022 - SEP 2026, University of Mosul

PROFESSIONAL CERTIFICATES

Full Stack Mobile Development, TSCY

AUG 2025, Mosul space

IT Training Cohort, Tech Hub

FEB 2025, QAF Lab

Application design and integration with databases, CDC

FEB 2025, University of Mosul

VOLUNTEER ACTIVITIES

Inventory Management Application – University of Mosul DEC 2025

Developed a volunteer mobile application for managing warehouse operations and inventory tracking. The system was built using Flutter and SQLite, enabling efficient data storage, product tracking, and improved inventory organization within the institution.

CodeRush Hackathon – University of Mosul JAN 2026

Served as a volunteer supervisor during the CodeRush Hackathon at the University of Mosul. Provided guidance and technical advice to participants, and assisted in organizing and managing event activities to ensure smooth execution.

PROJECTS

Electronic Management System for Continuous Education Center – University of Mosul

- Developed a web-based system for managing training courses and participants.
- Built backend using Laravel.
- Designed and implemented database structure using MySQL. Managed roles, permissions, and user accounts. Generated reports and certificates.

Sports Facilities Management Application

- Developed a system for managing and booking sports fields.
- Supported multiple sports (football, volleyball, basketball, etc.).
- Implemented reservation system and scheduling features.
- Built backend APIs and database structure.

Warehouse Management System – Ibn Al-Atheer Printing Press (University of Mosul)

- Developed an inventory management system for tracking warehouse items.
- Implemented stock in/out operations and reporting system.
- Designed database and backend logic.
- Improved workflow efficiency for inventory tracking.

Nafsiyati – AI-Driven Student Mental Health Platform

- Developed an AI-driven platform for evaluating and supporting student mental health.
- Managed AI engine operations, request routing, and implemented output validation guardrails.
- Integrated IoT wearable sensors (ESP32, BLE) to stream live physiological data to a mobile app.
- Built backend APIs using FastAPI and optimized the integration of machine learning models to achieve 99.67% accuracy.

SKILLS

Languages & Database: Dart, Python, PHP, SQL, C++, javascript .

Frameworks & Libraries: React.js, Flutter, FastAPI, Laravel, ORMs.

Tools & Methodologies: Git & Version Control, OpenAPI, Software Development Lifecycle, Agile/Scrum, API Design & Integration, UI/UX Principles.

Deployment & Infrastructure: Nginx Configuration, Linux Cloud Management, CI/CD.

Professional: Project Management, System Analysis & Requirements Gathering, Team Collaboration & Communication , Quick Troubleshooting & Problem-solving, Software Testing & Debugging.

LANGUAGES

Arabic - Native

English - Intermediate
